AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

Claims 1-17 (canceled)

Claim 18. (Currently Amended) A method for topographic genotyping comprising the steps of:

placing a biological specimen having DNA of a patient under a microscope; inspecting the biological specimen microscopically with the microscope; choosing a microscopic sized target on the biological specimen based on its histopathologic characteristics;

separating the target from the specimen;

extracting DNA from the target in an aqueous solution, wherein the extraction does not include DNA precipitation;

centrifuging the aqueous solution from the extraction step the resultant material directly from the DNA extracting step to create a pellet and a DNA-containing supernatant;

removing the <u>DNA-containing</u> supernatant so that the DNA sequences therein can be amplified;

amplifying the DNA sequences of the DNA-containing supernatant; and detecting mutations in the DNA sequences.

Attorney's Docket No. <u>034217-003</u> Application No. <u>10/008,278</u>

- Claim 19. (Currently Amended) A method according to Claim 18, wherein the biological specimen is a biological specimen of fixative treated tissue.
- Claim 20. (Currently Amended) A method according to Claim 18, wherein the biological specimen is a tissue section, cytological fluid, filter or cellular specimen.
- Claim 21. (Currently Amended) A method according to Claim 18, wherein the specimen is a tissue section, and the separating step <u>further</u> includes steps of slicing the target from the <u>tissue</u> section and placing the target on a glass slide.
- Claim 22. (Currently Amended) A method according to Claim 18, wherein the specimen is a tissue section, and the separating step <u>further</u> includes a step of placing the target in a tube.
- Claim 23. (Currently Amended) A method according to Claim 18, wherein the separating step <u>further</u> includes steps of cutting an arc segment from the specimen, and placing the segment in a tube.
- Claim 24. (Currently Amended) A method according to Claim 18, wherein the extracting step <u>further</u> includes the step of placing the target in a lysis buffer.
- Claim 25. (Currently Amended) A method according to Claim 24, wherein the extracting step further includes a step of contacting the target with proteinase K.

Attorney's Docket No. <u>034217-003</u> Application No. <u>10/008,278</u> Page 5

- Claim 26. (Currently Amended) A method according to Claim 24, wherein after the step of placing the target in a lysis buffer, there is a step of adding phenol and chloroform into the lysis buffer with the target.
- Claim 27. (Currently Amended) A method according to Claim 26, wherein after the adding step, there is a step of separating short length fragments of DNA, wherein the DNA is being less than 100 base pairs in length, from the target.
- Claim 28. (Currently Amended) A method according to Claim 18, wherein the amplifying step comprises includes steps of:

choosing a primer corresponding to a gene of the patient;
adding the primer to the DNA sequences; and
performing polymerase chain reaction on the DNA sequences with primer.

- Claim 29. (Currently Amended) A method according to Claim 18, wherein the detecting step <u>further</u> includes a step of determining the DNA sequence.
- Claim 30. (Currently Amended) A method according to Claim 29, further comprising wherein after the determining step, there is a step of comparing the determined DNA sequence with known DNA sequences for corresponding DNA regions of the target.
- Claim 31. (Currently Amended) A method according to Claim 18, further comprising the step of establishing wherein after the detecting step, there is a step of establishing whether the DNA sequence is associated with a cancer.

Attorney's Docket No. <u>034217-003</u> Application No. <u>10/008,278</u>

- Claim 32. (Currently Amended) A method according to Claim 18, further comprising the wherein after the detecting step, there is a step of establishing whether the DNA sequence is associated with a condition hazardous to the health of the patient.
- Claim 33. (Currently Amended) A method according to Claim 18, wherein the amplifying step comprises cycling the DNA sequences in a polymerase chain reaction machine, with each cycle comprising heating them to a temperature no greater than 99°C, and then back to a temperature of 55°C in 5 minutes.
- Claim 34. (Currently Amended) A method according to Claim 33, wherein the separating step includes a step of cutting one to three 2-6 µm thick histologic sections from the specimen.
- Claim 35. (Currently Amended) A method according to Claim 32, wherein the biological specimen is a comprises human tissue specimen.
- Claim 36. (New) The method of claim 18, wherein thirty or less separate tests are performed on a single sample.
- Claim 37. (New) The method of claim 18, further comprising using the results of the genotyping in relational database.

Attorney's Docket No. <u>034217-003</u>
Application No. <u>10/008,278</u>
Page 7

- Claim 38. (New) The method of claim 37, wherein the database is used to identify a new type of cancer.
- Claim 39. (New) The method of claim 37, wherein the database is used to devise a treatment plan to treat a patient with diagnosed cancer.
- Claim 40. (New) The method of claim 39, wherein the cancer is selected from the group consisting of colorectal cancer, lung cancer, pancreas adenocarinoma, genitourinary cancer, skin cancer, hematologic malignancy, thyroid cancer, endocrine cancer, breast cancer, renal cell carcinoma, and von Hippel Lindau disease.
- Claim 41. (New) The method of claim 32, wherein the condition hazardous to the health of the patient is selected from the group consisting of inherited diseases, genetic polymorphisms, and infectious diseases.
- Claim 42. (New) The method of claim 18, comprising the further step of diagnosing an inherited disease in a patient.
- Claim 43. (New) The method of claim 18, comprising the further step of determining a genetic polymorphism associated with a genetic disease in a patient.
- Claim 44. (New) The method of claim 18, comprising the further step of diagnosing an infectious disease in a patient.

Attorney's Docket No. <u>034217-003</u> Application No. <u>10/008,278</u> Page 8

Claim 45. (New) The method of claim 18, comprising the further step of devising a course of treatment for a patient suffering from an infectious disease.
